DETAILED ACTION

1. Claims 22-27 are pending in the application.

Response to Arguments

2. Applicant's arguments with respect to claims 22-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke (U.S. Patent no. 3,813,404).

Clarke discloses Tropane derivatives (see col. 1, lines 10-60). The disclosed compounds of Clarke (see examples 1-14 and claims 1-8) differ from the instant compounds in having the instant R₂ group as 3-beta isomer instead of 3-alpha isomer. However, Clarke teaches that any stereochemical arrangement of the nucleus and substituents groups is contemplated (see col. 1, lines 48-50). Therefore, it would have been obvious to one skilled in the art to prepare the

instant compounds having R2 group as 3-alpha isomer by modifying 3-beta isomer since clarke teaches this interchangeability for the substituents as mentioned above.

5. Although applicants have amended specification to claim priority to earlier date yet it is of note that Kuhar (U.S. Patent no. 6,358,492) claims the instant 3 alpha isomers (see claim 1) and therefore, an interference will need to be declared once all other remaining issues (103) are resolved.
